

# Installation Options

Following are the various items that are available on the DVD (on Windows, the options appear on the AutoPlay menu). Depending on your operating system and version of IBM® SPSS® Statistics, some options may not be available. Use this document to determine what you need to install and where to find the appropriate installation instructions on the DVD in the */Documentation/<language>/InstallationDocuments* folder.

Option	Do I Need It?	Installation Instructions
IBM SPSS Statistics	Install this if you want a statistical and data management package for analysts and researchers. Install SPSS Statistics before the other options for SPSS Statistics.	<operating system>/SPSS Statistics/<license type> Installation Instructions.pdf
IBM SPSS Amos	Install this if you want a powerful and easy-to-use structural equation modeling (SEM) application. IBM® SPSS® Amos™ requires an additional license and is available only for Windows.	Windows/Amos/<license type> Installation Instructions.pdf
IBM SPSS Data Access Pack	Install this if you need the DataDirect ODBC and JDBC database drivers. IBM® SPSS® Data Access Pack is available only for Windows and Linux.	<operating system>/IBM SPSS Data Access Pack Installation Instructions.pdf
IBM SPSS Statistics - Essentials for Python	Click this to learn about installing support for programming SPSS Statistics with Python.	Programmability/Python/Installing Python Components.pdf
IBM SPSS Statistics - Essentials for R	Click this to learn about installing support for programming SPSS Statistics with R.	Programmability/Python/Installing R Components.pdf
